SUMMARY

Experienced PHP Fullstack developer with 4 years of experience in PHP, Laravel, JavaScript, and MySQL. Proven ability to design, develop, and implement web applications to meet the needs of clients. Skilled in leveraging existing technologies to build efficient and cost-effective solutions. Applying for a position as a PHP Fullstack developer.

EXPERIENCE

Software Developer | Audiomack

October 2020 - Present, US, NY, New York

- Led integrating a 3rd-party song lyrics service, implementing efficient caching to boost performance and reduce API calls.
- Demonstrated solid problem-solving skills by developing quick-fix scripts and tools using PHP, contributing to a more efficient moderation portal.
- Played a pivotal role in enhancing internal tools for Admins, resulting in a significant boost in moderators' productivity and workflow efficiency.
- Skills: PHP, GIT, RabbitMQ, PostgreSQL, Javascript, Typescript, React, Redux and NodeJS.

Full Stack Developer | Abrahams Consulting Limited

January 2018 - Present, Lagos, NG.

- Developed a feature-rich accounting solution encompassing expense management, detailed reporting, and role-based user access.
- Utilized PHP with Laravel and integrated MySQL for robust data storage, crafting intuitive dashboards and portals with HTML/CSS, JavaScript, Vue.js, and Bootstrap.
- Achieved a remarkable 65% boost in productivity by standardizing expense forms, eliminating manual spreadsheet entries, and enhancing transaction record-keeping.
- Implemented a dynamic report generation and sharing system, reducing manual reminders and optimizing the reporting workflow.
- Stack: PHP, Laravel, GIT, VueJs, JavaScript, MySQL.

Full Stack Developer | Jackocoins

January 2023 - January 2023, Lagos, NG.

- Built and maintained currency exchange systems, wallet, and ledger functions.
- Integrated third-party services such as blockchain.info, Binance & Twilio for SMS/Email notifications, market prices, and trading requests.
- Set up Linux VPS servers with Apache for deployment and created an Admin portal for monitoring and actions.
- Developed APIs for exchanging cryptocurrencies for local currency and implemented self-hosted Ethereum and TRON Blockchain nodes.
- Maintained React-based code, fixed bugs, and integrated services such as Mailgun, Block.io, and security-related tools.
- Served & managed the operations of up to 20,000 users and 2,000 daily exchange transactions.

Full Stack Developer | GigaLayer

November 2020 - November 2020, Lagos, NG.

- Developed an online platform allowing web-hosting platforms to purchase bulk domain names through APIs.
- Designed and deployed the service, including an Admin portal, merchant portal, developer portal, and well-documented API services.
- Utilized PHP with Laravel and MySQL for backend development, while designing a user-friendly portal using HTML, CSS, JavaScript (including Vue.js), and Bootstrap.
- Implemented secure portals for Admins, merchants, and developers, facilitating pricing management, white-labeling, API calls, and payments, with seamless integration to multiple registry services.
- Stack: PHP, Laravel, SOAP, GIT, Javascript.

Junior Backend Developer | Tradedepot Inc

January 2018 - January 2019, Lagos, NG.

- Built and maintained an e-commerce backend system built using meteorJS and javascript.
- Created automated tests that improved the testing coverage of the app.
- Maintained admin moderation backend dashboard.
- Built rendering data on the KeplerGL mapping library to monitor dispatch delivery vehicles.
